February is trials month, and this year we have arranged trials for 49 resources. Please find below details of all of the resources that we are trialling. There are limited funds for new resources and so your feedback is essential to ensure that we spend the money wisely. Please take a look at resources in your area of interest and complete the feedback form at:

https://intranet.birmingham.ac.uk/trialfeedback

We will not trial these resources again for another 2 years so if you want them please feedback!

All of the resources mentioned below can be accessed via the ‘Database’ part of FindIt@Bham http://findit.bham.ac.uk/ Links to either the resource or information about it can be found by clicking on the titles below.

Global Digimap
Global Digimap is a new service in development with you the users. The service will provide access to global datasets in cartographic styles and downloadable formats that are useful to you. Please use our feedback form to let us know how useful you think this product will be for your teaching, research and learning. Edina would also like users to provide them with feedback so that they can develop the service further. Please email them on: digimap@ed.ac.uk

Springer Materials
A comprehensive database for identifying material properties which covers data from materials science, physics, physical and inorganic chemistry, engineering and other related fields. Enhanced data visualization features display interactive crystal structures, data tables, and phase diagrams with export options for further analysis.
Research Skills and Tools

Cochrane Interactive Learning

**Resource**

Once on the homepage of the resource click on the ‘New users and subscribers’ button and click on the ‘Create a Cochrane account’ button.

This online course provides over 10 hours of self-directed learning on the complete **systematic review** process for both new and experienced review authors.

Covidence

To access this trial please contact Natalie Blanchard: product@covidence.org.

A tool to help manage the **systematic review** process.

Gale Digital Scholar Lab

The Digital Scholar Lab is designed with a database-style interface and user workflow that is familiar to students and researchers who are new to data mining. It combines analysis-ready raw text data with digital tools and algorithms to drive visualizations and discoveries that are the hallmark of **data mining** and digital scholarship. This resource only works with Gale Primary resources that we already subscribe to.

Proquest Central

We currently have a trial of this resource until the end of December.

ProQuest Central brings together the most comprehensive, diverse, and relevant multi-disciplinary research database available. It provides access to databases across **all major subject areas**, including business, health and medical, social sciences, arts and humanities, education, science and technology, and religion. The collection includes thousands of full-text scholarly journals, newspapers, magazines, dissertations, working papers, and market reports all together on a powerful, user-friendly platform.
