# Client: Centre for Musculoskeletal Ageing Research

## The brief

The Centre for Musculoskeletal Ageing Research in the College of Medical and Dental Sciences came to us to refresh the look and feel of their online presence.

## Our response

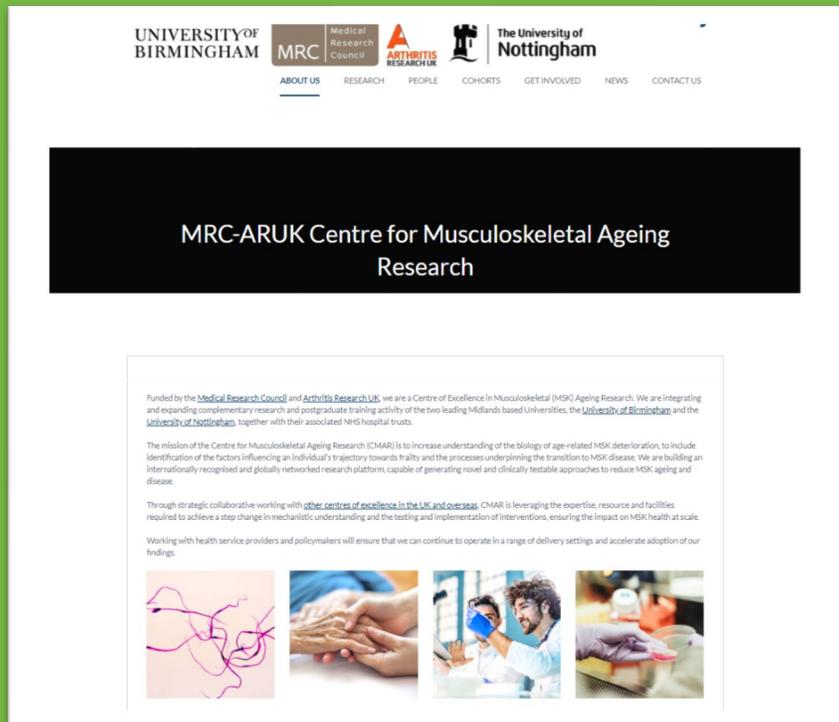

We addressed the client's needs by providing them with a stunning responsive online presence that aligned itself with the Centre's branding. We included parallax scrolling, a technique that provides a sense of depth to flat images and a WordPress back-end that allowed them to update the site without having to have any knowledge of coding.

## Success

Following the launch of the website in December 2019, the client has expressed how pleased they are with the look and feel of their new website.
