# Canvas

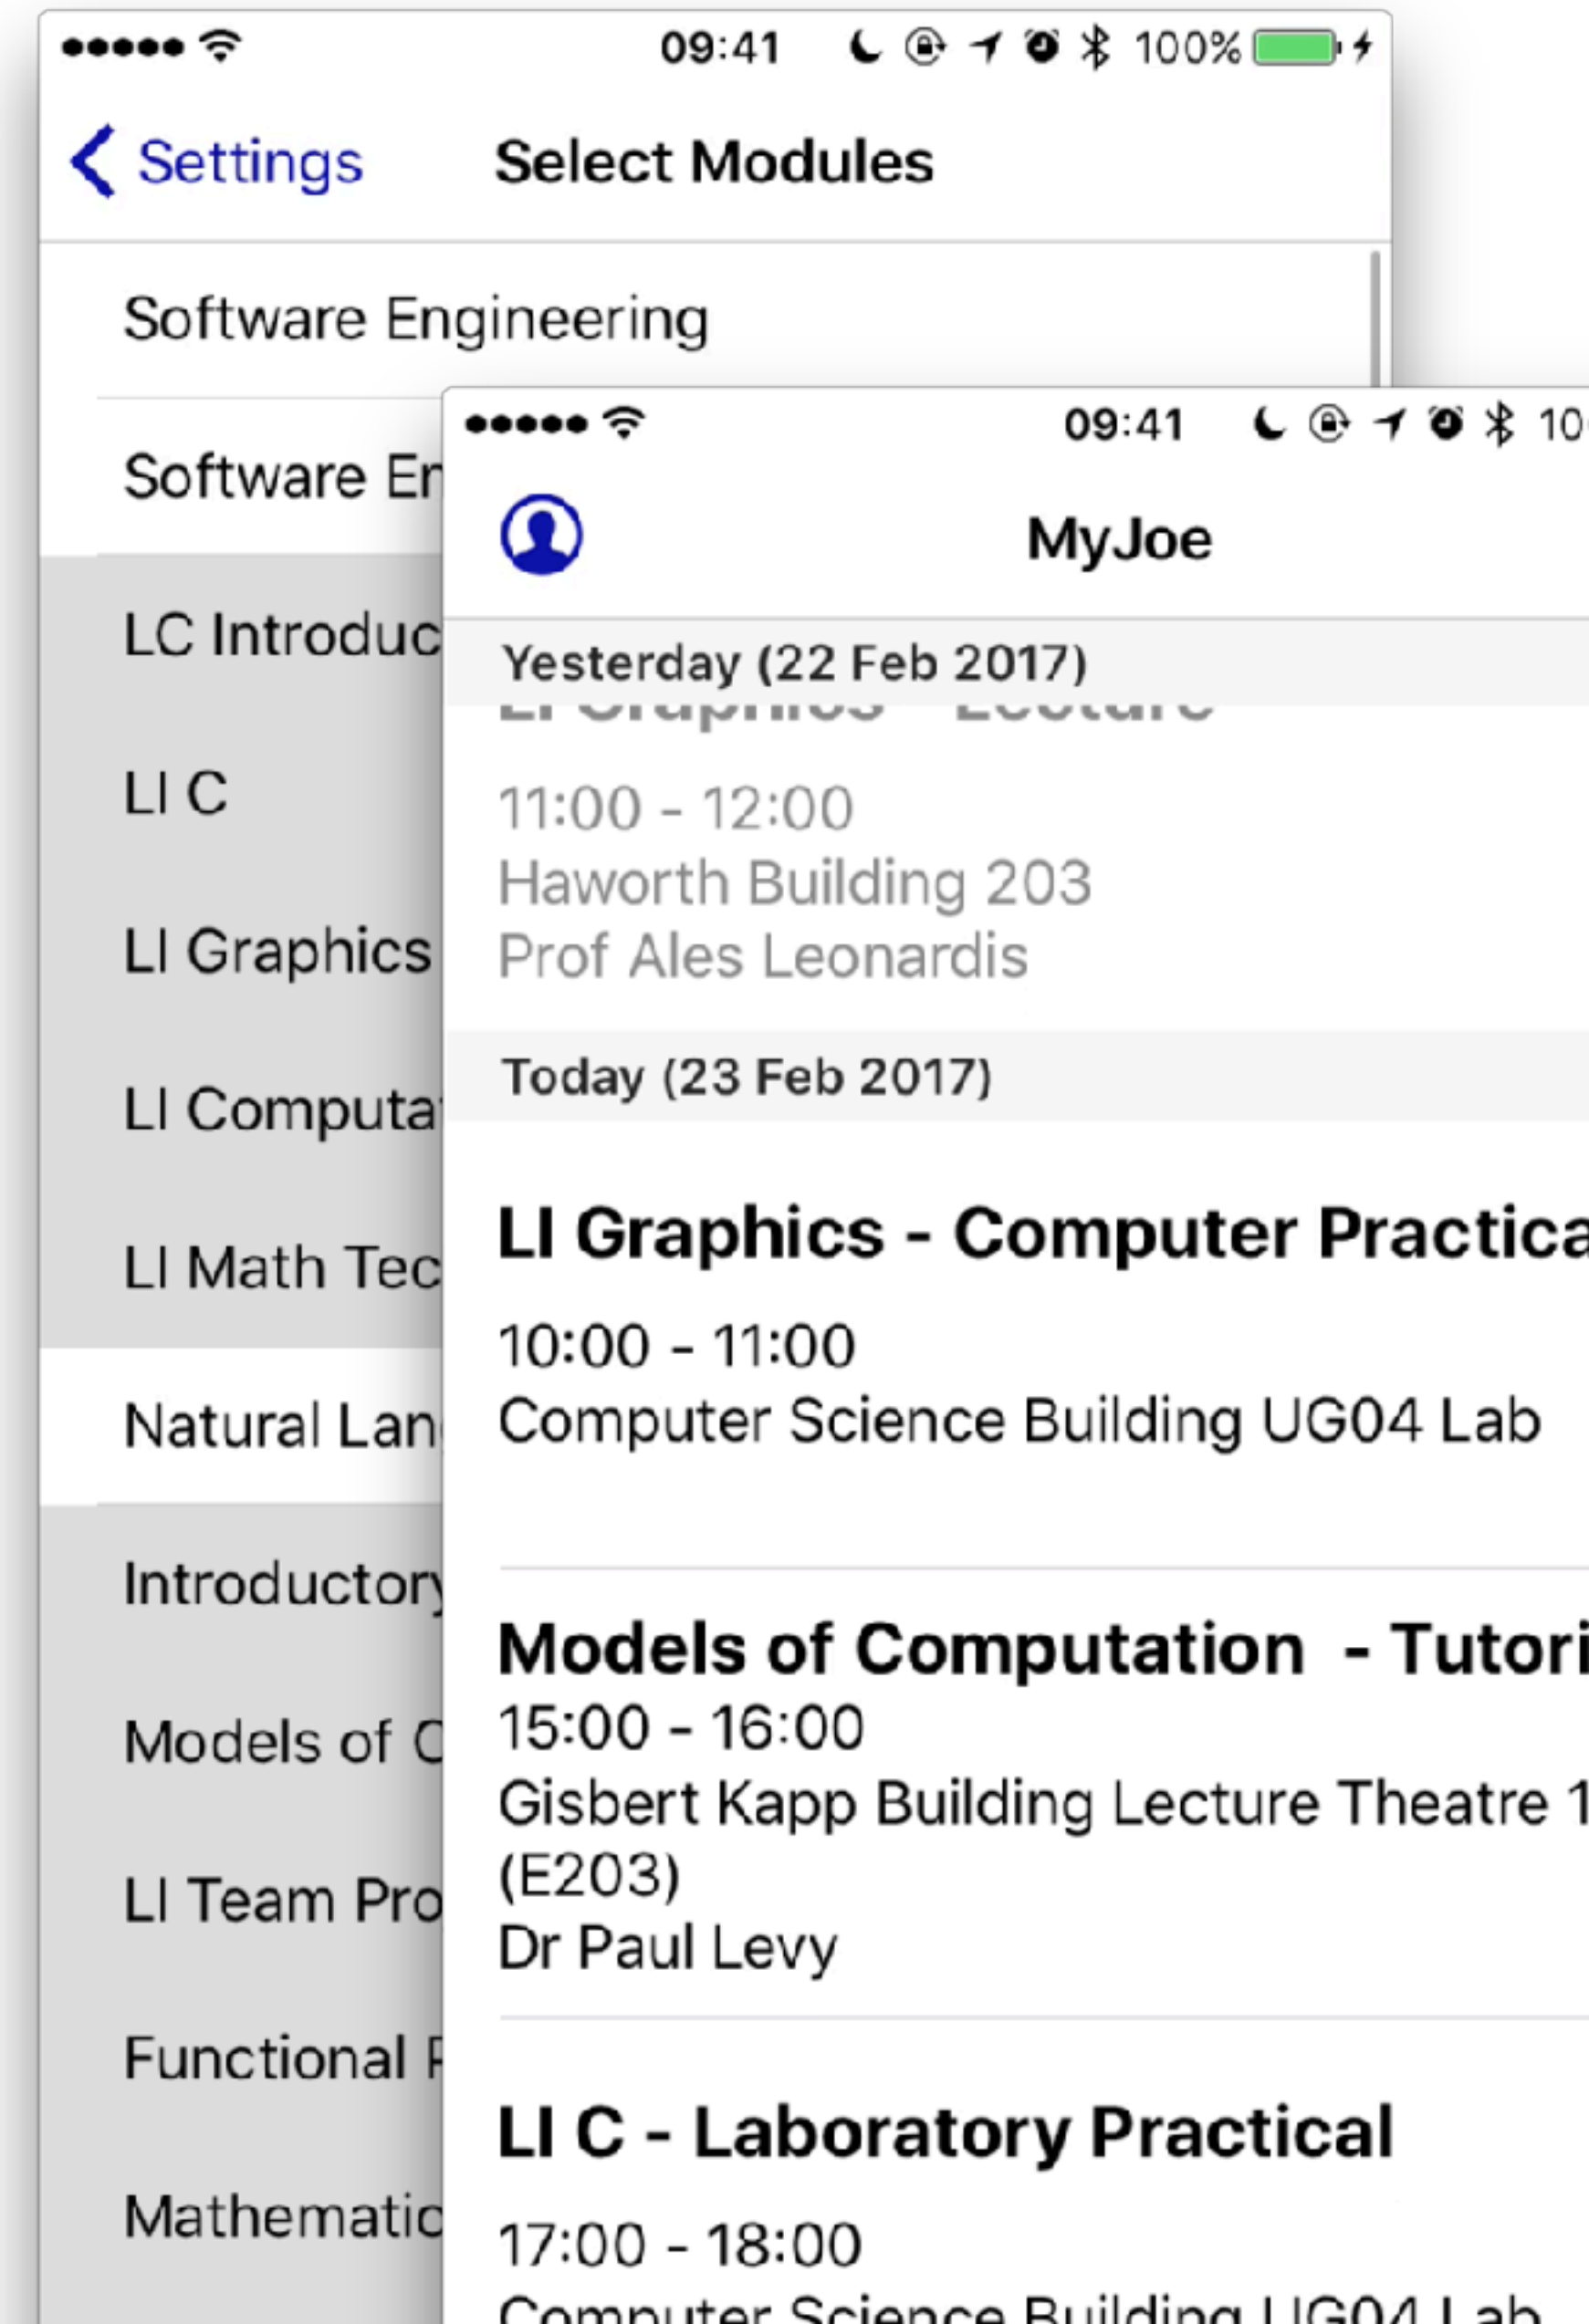

- Helps you to keep track of assignments **to complete, completed** and **overdue**
- Shows assignment **grades**

# Web Timetabling

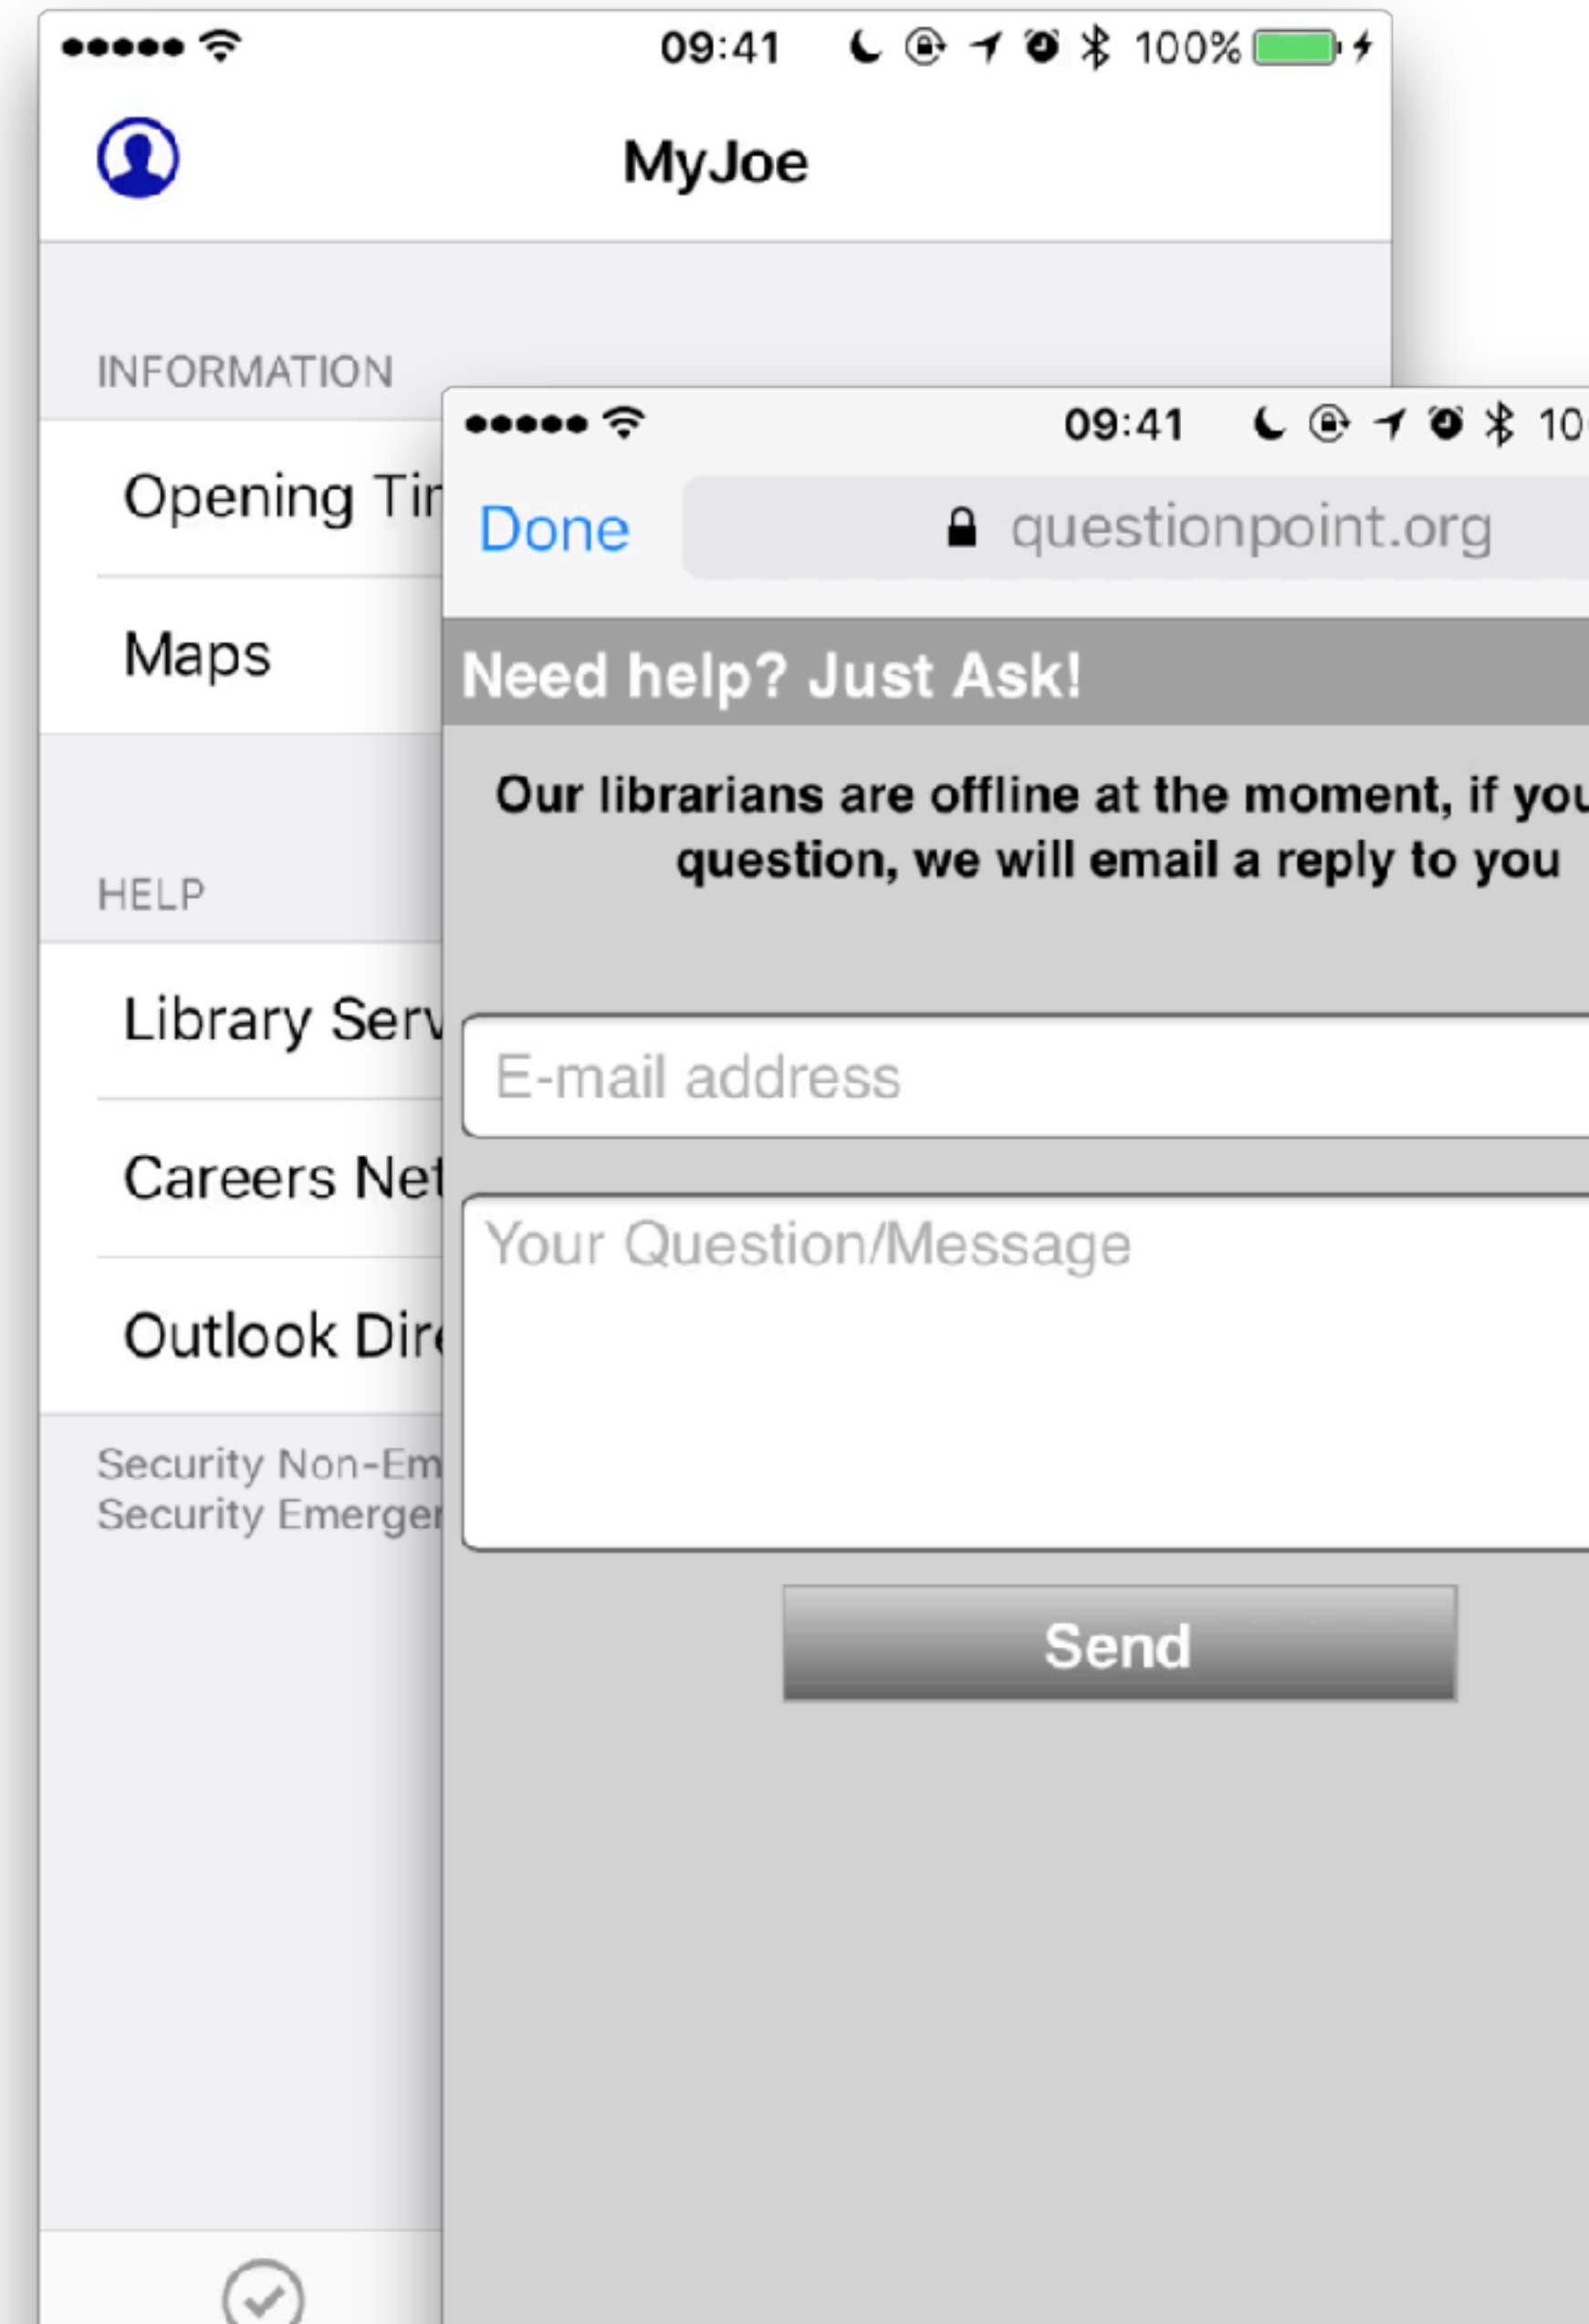

- **Fast access** to an **up-to-date** timetable - no need to rely on an old screenshot
- Options available to choose your programme and modules for customising the timetable

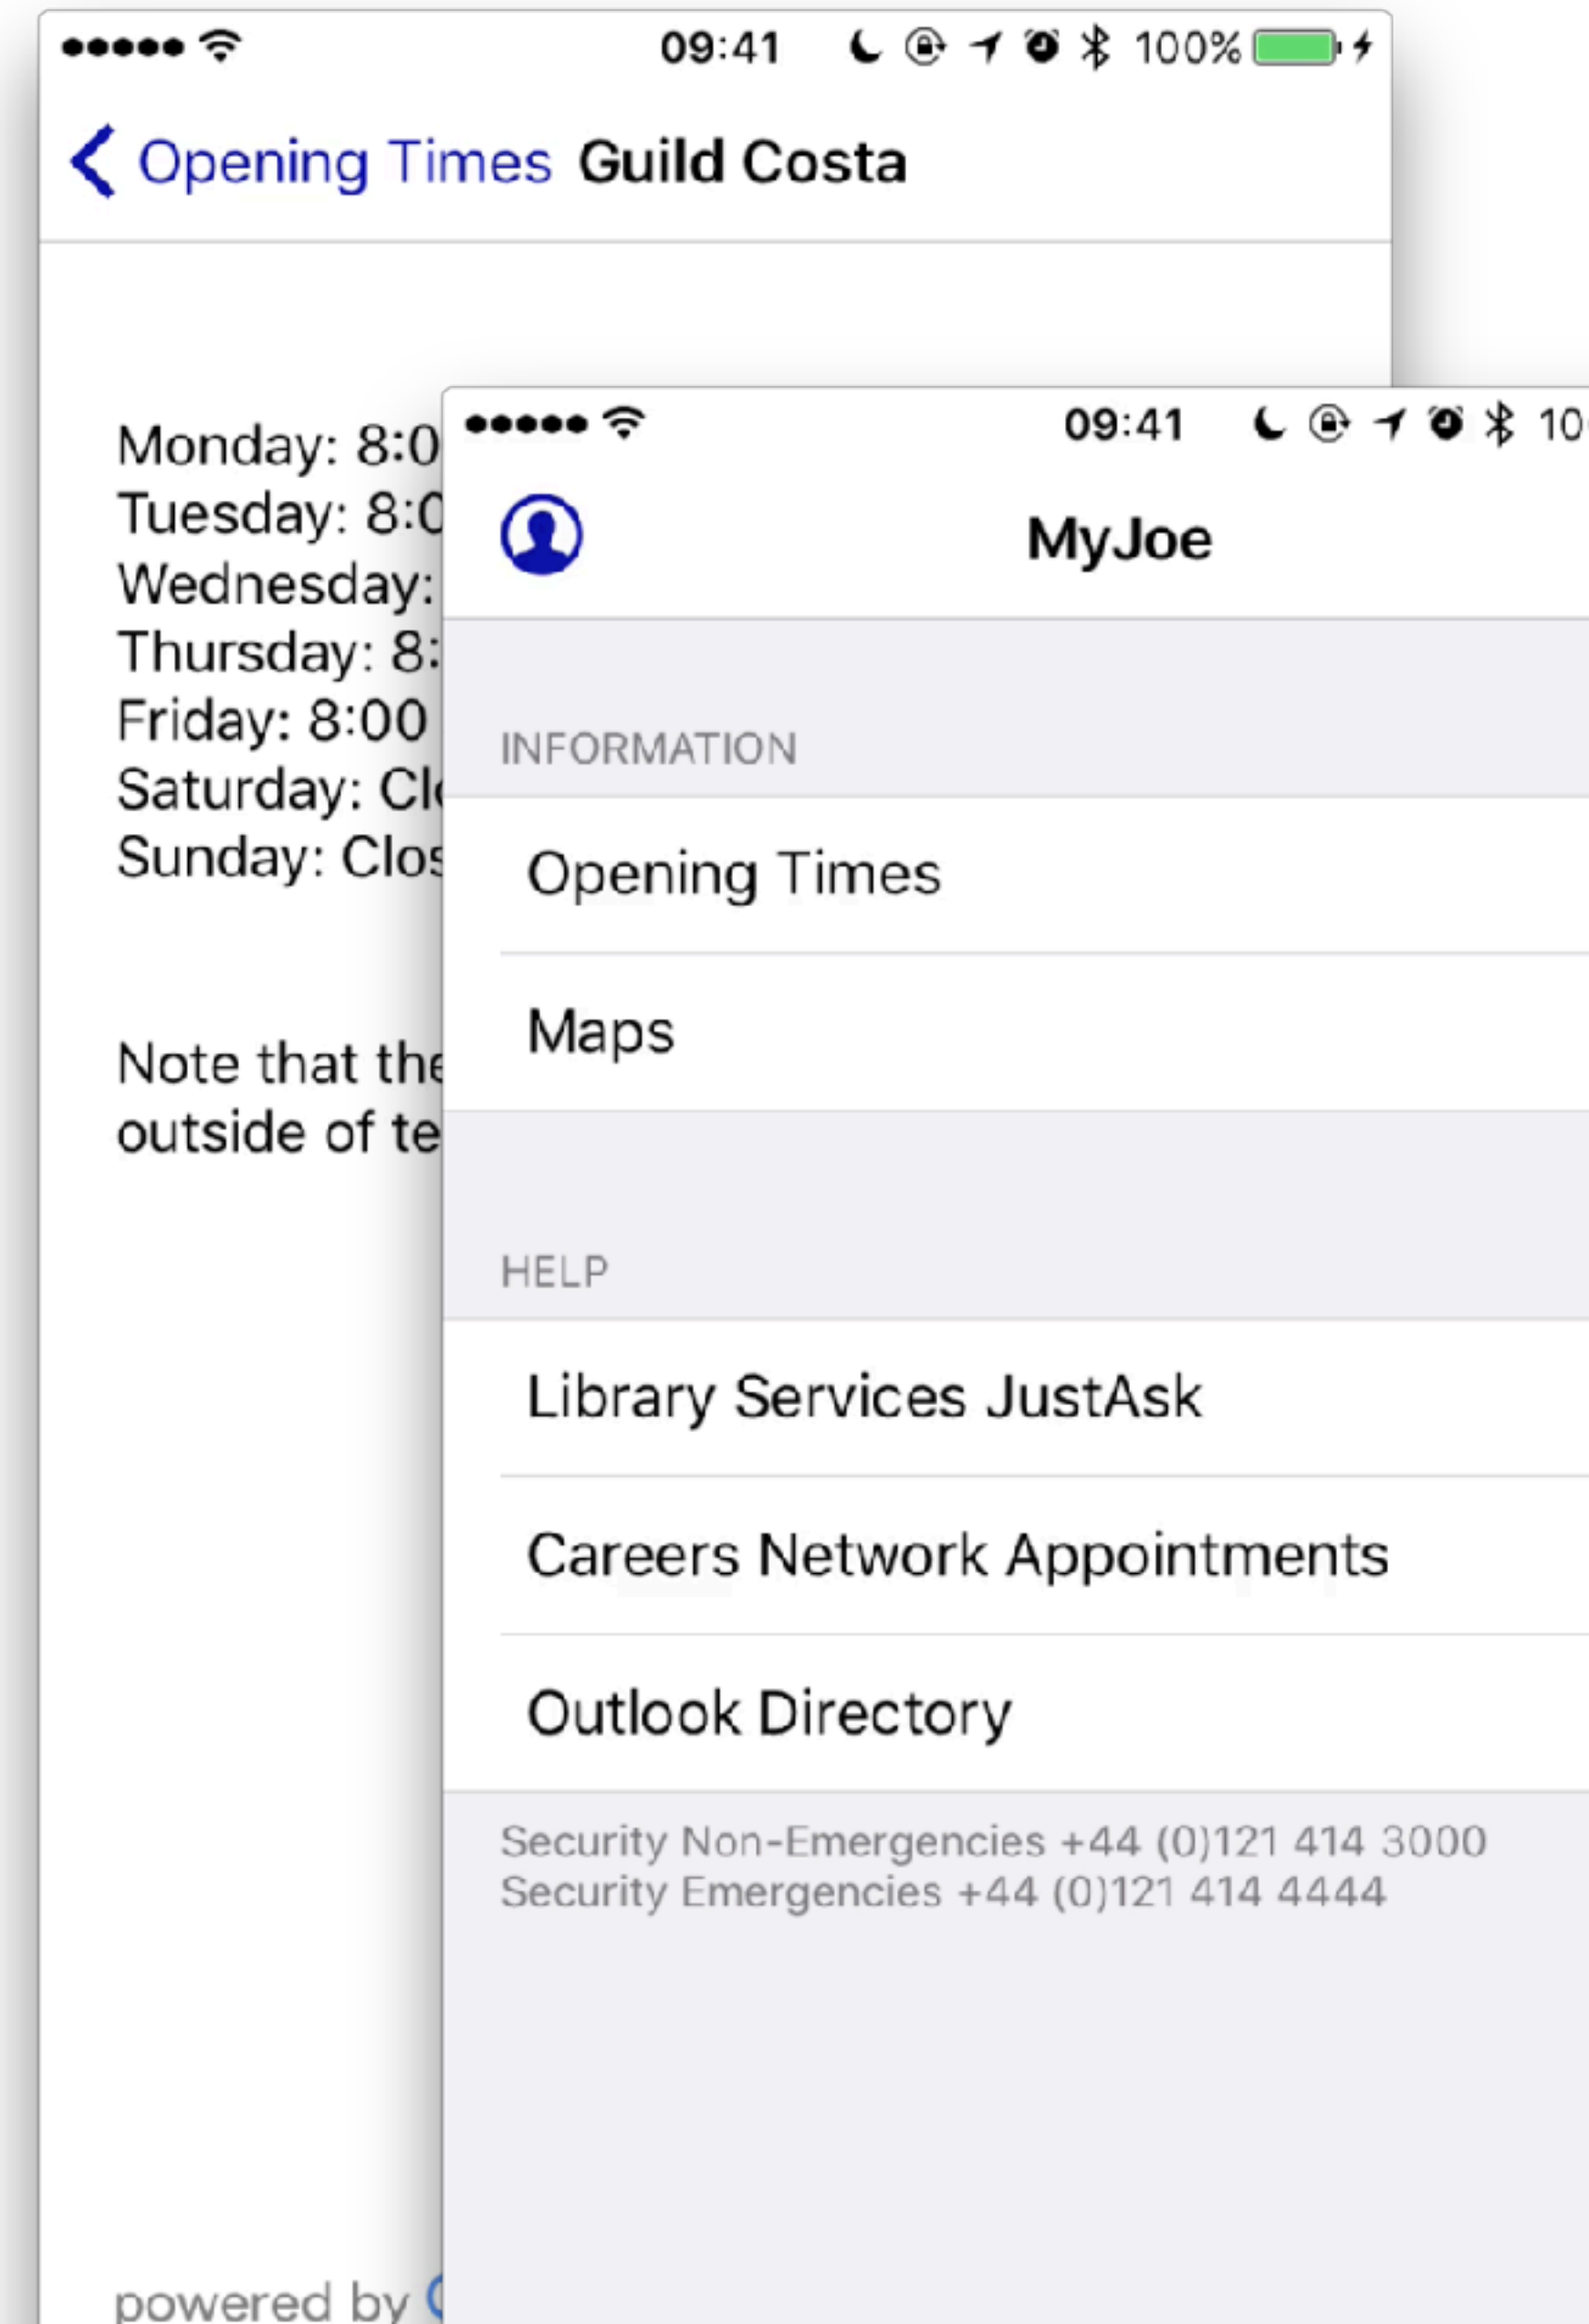

# Library Services

- Quick link to **Just Ask**, the chat service for asking about anything from your library account to book availability
- In a future version, I'd like to add current loans into MyJoe

# Help & Support

- Opening Times & Maps
- Just Ask, Careers Network Appointments & Outlook Directory searching
- Emergency contact numbers for Security Services

# Quick Technical Stuff

- Queries to the **Canvas API** require user-generated **API keys** (collected by running JavaScript on a Canvas page after asking the user to login)
- **No username/passwords stored on the device**
- **Web Timetables** data is obtained from **scraping** HTML from the timetabling website, to automatically select and parse the necessary data
- Source code is available on GitHub at [github.com/jackhughesweb/BhamDashboard](https://github.com/jackhughesweb/BhamDashboard)

# Future Features

Add **Library Services**  
data for loans and  
reservation collections

Making the app  
**faster** and  
**more stable**

Create an  
**Android app**

Adding support  
for **emergency  
alerts** on campus

**Notifications** for £1  
Domino's pizza at the Guild

# MyJoe Demo
