

QR Vision

Developed by Filippo Galli

**Have you ever got lost
in a building?**

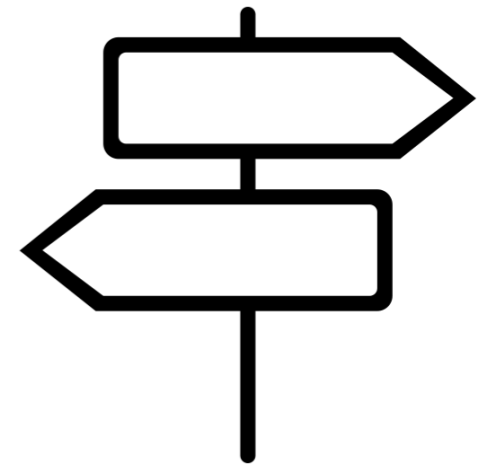

QR Vision

QR Vision

What Does it do?

- It allows the user to get directions from a location to another inside a building

How Does it work?

- Identify a location by a QR code
- Using Google Maps Indoor API

QR Vision

Demo

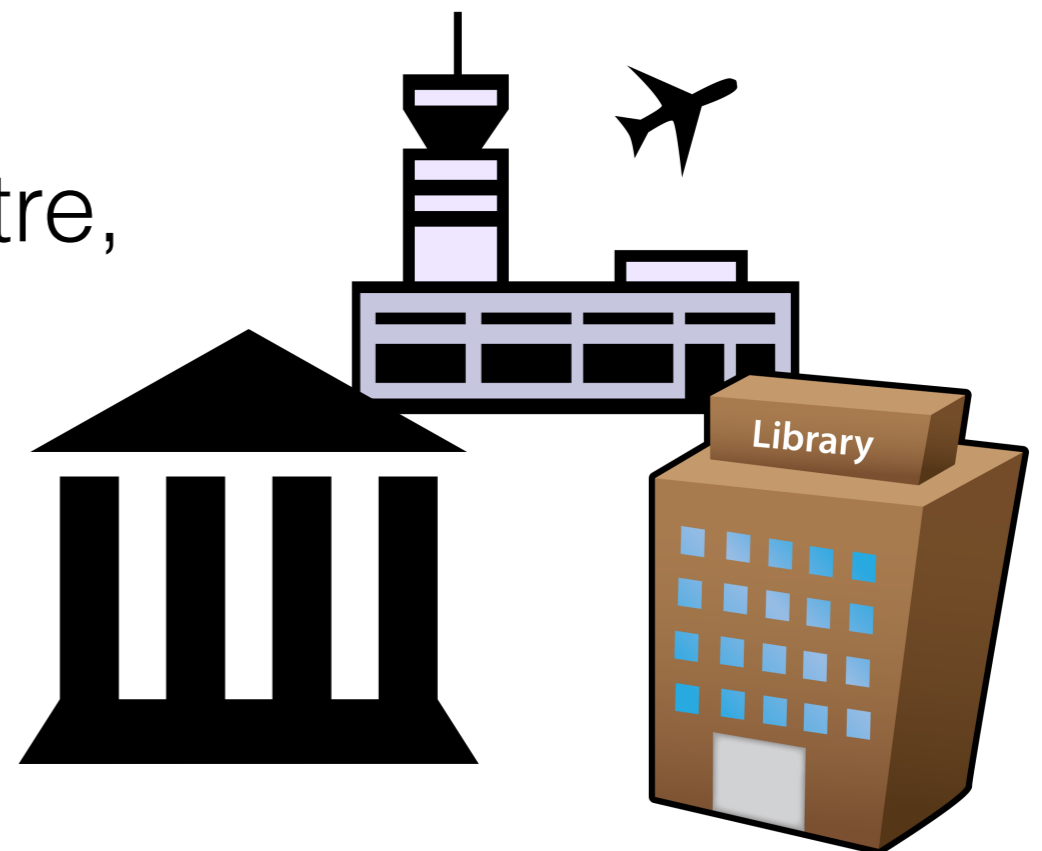

QR Vision

Potential Users:

- Everybody with a smartphone can use QR Vision

Possible Buildings:

- Museum, Library, Shopping Centre, Airports, University, ...

QR Vision

Future Developments

- Contact Google for getting access to offline indoor Maps
- Send sms to a server in order to get directions without using internet
- Add the possibility to read NFC tag

QR Vision

Thank You!
