

UoB Devices - Toner Codes

UoB “Local Contacts” for the Managed Print Solution need to supply replacement toners to end users from their central stockholding based on the toner codes below.

The end user just needs to confirm to the “Local Contact” which device type they have (C654e; C368, C308; C3350 or C3100P) and which colour toner has run out.

The “Local Contact” then needs to reference the codes below and provide the end user with the correct toner for their device. The end user then fits the new toner to the device themselves.

KM will then “top up” the central buffer stock with a replacement toner.
