This risk assessment covers all communal areas within the building (i.e. corridors, kitchens, toilets, offices, etc...)

Lab risk assessment will be covered in individual RA’s that will be assessed, completed and authorised by the principal investigator over the lab.
Organisational Psychological well being Staff Students Contractors Visitors Anxiety and stress caused by concerns around returning to work and studies on Campus

Regular communication is in place (individual and group) via team meeting, one to one meetings, health and safety committees/forums to ensure staff and students are not ill-informed about returning to work/study safely.

Advice is shared with staff members and students and they have been fully briefed and kept up to date with current advice on staying protected through the University’s lines of communications (i.e. line managers, Internal Comms) and shared with staff via team meeting, one to one meetings, health and safety committees/forums and the University’s Coronavirus FAQs click here.

Risk assessment shared and an electronic copy is available on Teams Metallurgy and Materials Building Reopening/Risk Assessment / Building

New workplace/controls put in place to reduce risk of exposure to COVID 19 are documented in and disseminated to employees through Line Managers and personal tutors and Canvas. These include:

These include:
- Local induction materials
- COVID-19: Building Risk Assessment (This completed Risk Assessment)

Line managers are aware of how big changes to working arrangements may cause additional work-related stress and affect their employees' mental health and wellbeing and individuals have been made aware via induction, team meeting, one to one meetings, health and safety committees/forums of guidance available in relation to this: https://www.hse.gov.uk/stress/

https://intranet.birmingham.ac.uk/staff/coronavirus/Coronavirus-wellbeing-support.aspx

https://intranet.birmingham.ac.uk/hr/wellbeing/workhealth/stress-management-guidance.aspx
| Organisational Psychological well being | Staff Students Contractors Visitors | Anxiety and stress caused by concerns around working on Campus | Managers hold regular informal discussions on Teams with their team and look at ways to reduce causes of stress. Concerns on workload issues or support needs are escalated to line manager through one to one meetings as needed. Information on the full range of Coronavirus – Covid-19 support available for staff including those who were previously advised by Occupational Health or a medical professional (including a midwife in respect of pregnancy) not to work on campus and staff who are in the clinically extremely vulnerable group (i.e. those previously advised to shield) is available here. Existings risk assessments including those for new or expectant mothers reviewed and revised to reflect new working arrangements. Reasonable adjustments made, including those needed for PEEPs especially in relation to who will assist with their evacuation in an emergency, to avoid staff that require them including disabled workers being put at a disadvantage. Employees who have concerns about either working on Campus or working from home/remotely have discussed these with their line manager or supervisor and concerns have been formally recorded and where necessary they have been signposted to the EAP for support and / or a referral to occupational health has been made using a standard Management Referral available via the HR Portal. Employees are made aware of support mechanisms available to them (e.g. counselling, occupational health, HR, etc.) through line managers, internal communications and University webpages: Working on campus [birmingham.ac.uk] https://intranet.birmingham.ac.uk/staff/coronavirus/faq-for-staff.aspx https://intranet.birmingham.ac.uk/hr/wellbeing/index.aspx https://intranet.birmingham.ac.uk/hr/wellbeing/workhealth/index.aspx This link is for students: https://intranet.birmingham.ac.uk/student/coronavirus Wellbeing.aspx | 3 | 2 | 6 | Yes |
| Biological | Virus transmission in the workplace | Staff | Students | Visitors | Contractors | Exposure to respiratory droplets carrying COVID-19 from an infectious individual transmitted via sneezing, coughing or speaking. | Staff continue to work using the mixed model of site and home based (hybrid working – if possible, depends on type of work) as agreed with line manager, in line with Government and University guidance. | Managers/supervisors ensure staff and students with any form of illness do not attend work/campus until the illness has been verified as not being Covid-19. | Managers/supervisors keep track of when staff and students can return to work/campus after the self-isolation period. | Regular access to the Lateral Flow Device tests and kits are available to staff and students who are coming onto campus. Staff and students are strongly encouraged to test twice a week and to record their results on the Government’s reporting website: https://www.gov.uk/report-covid19-result and to report any positive test results to the University using the COVID-19 reporting form. | The University’s on-line-materials for returning to campus combination of the guidance and videos have been provided and completed for all staff working in University buildings. | Schedules for essential services and contractor visits revised to reduce interaction and overlap between people and all contractors and visitors will be approved and registered by the Technical Manager or delegate. | Un-essential trips within buildings and sites discouraged and reduced, e.g. staff are asked to remain within their allocated zone. Use of telephone and online calls encouraged to reduce face to face contact and will be cleaned between uses. | 4 | 2 | 8 | Yes |
Environmental Virus transmission in the workplace due to contact with other people

Staff Students Contractors Visitors

Exposure to respiratory droplets carrying COVID-19 from an infectious individual transmitted via sneezing, coughing or speaking.

Workplaces and routines changed to reduce the number of people staff come into contact with including:

- Staff have been separated into teams to reduce contact between employees
- Fixed teams or adjusted booking processes in use to reduce the number of people in a lab at the same time to avoid overcrowding. Some training courses have moved online. PPMS system used to book equipment and equipment training online.
- Screens or barriers used to separate people from each other especially where people come into close proximity with each other including at points of service, for example at reception desks, tills and counters.
- Back-to-back or side-to-side working (rather than face-to-face) used whenever possible.
- Seating areas for serving food or drinks have been assessed in accordance with government guidance to reduce the number of people being able to congregate. Kitchens continue to be used at reduced capacities. All users are encouraged to wash or sanitise their hands prior to using equipment (kettle, drinking water fountains, microwaves etc.) and to wash or sanitise their hands after use. Additional signage for the correct method for handwashing displayed. Cleaning materials are available to clean equipment before and after use and signs displayed with information about cleaning and also a contact to replenish the any cleaning materials.
- Where available safe outside areas used for break.
- Welfare facilities (toilets etc.) have signage to remind people to wash their hands prior to and after use and also of any other measures required to ensure safe use of the facilities including building users being reminded to leave the facilities in a respectable condition.
- For multi-use offices, cleaning rotas will be in place (each office gets cleaned twice daily by the users) and each office has its own local rota to limit the number of people working in the office at any one time. Recommendation - office use to be minimised wherever possible and implement a clear desk policy to facilitate cleaning. If not possible screens will be needed.

To help contain clusters and outbreaks and assist the University with any requests for data by the NHS Test and Trace service a temporary record of shift patterns
and teams and attendance in the building is kept for 21 days. NHS Test and Trace QR code is displayed in the building for visitors and staff that can be scan using the NHS Covid-19 app.

Work has been arranged so that staff are able to maintain the government guidelines for workplaces. The latest Guidelines on these measures can be found by clicking the following link Workplace Guidelines.

Due to the potential increased risk of transmission from aerosol transmission steps have been taken to avoid people needing to unduly raise their voices to each other e.g. not playing music or broadcasts at a volume that makes normal conversation difficult, using microphones during training sessions

One way systems in corridors and staircases will be removed. Also wash hand / use hand sanitiser on exit from stairwell.

Face masks/covering will be strongly recommended and encouraged in the building including in communal areas (i.e. corridors, stairwells, kitchens, toilets, etc...), this will be communicated through signage, meetings, induction, etc....

Visits from people outside of the building are managed via remote connection/working where this is an option. Where this is not an option including contractors, Estates, engineers etc. visitor arrangements have been revised to ensure social distancing and hygiene at all times. These measures are monitored by the Technical Manager or delegate/ health and safety coordinator and where necessary concerns fed back to the third party manager e.g. LEV inspections and test – Estates Manager, Cleaner – Campus Services Domestic Manager.

Where this is not an option visitor and contractor arrangements have been revised to ensure:

- Clear guidance on how to reduce the risk of spreading COVID-19 to people is given to them, in a form of a building induction on their first visit as well as on-site signage and visual aids.
- Host responsibilities related to COVID-19 have been established and any necessary training for people who act as hosts for visitors has been provided.
- Visitors are told they should be prepared to remove face coverings if asked to do so by UoB security officers and staff for identification.
• Information provided to visitors does not compromise their safety. These measures are monitored by the local supervising staff member and where necessary concerns fed back to the third party manager.

Information provided and signs displayed encouraging people to use the stairwells rather than lifts unless they have difficulty using the stairs and to wear face coverings inside lifts when used.

Non-work related gatherings (social) amongst employees will be allowed but will be encourage to remain social distant through signage. Visual meeting will continual to be encourage over face to face meetings.

Large gatherings including events in public spaces that are organised by the University are only permitted with steps to mitigate the risk of transmission and in line with COVID-19 Secure guidance including the completion of a specific risk assessment.

Managers perform frequent evaluation against social distances controls through walk-arounds and observation. Staff are reminded through the signage on a daily basis of the importance of social distancing both in the workplace and outside of it.

Near-miss reporting is encouraged to identify where controls cannot be followed or people are not doing what they should.

No working in close proximity to people and in particular a person’s face, mouth and nose, for an extended period of time (the majority of the working day) is permitted unless the work is essential PPE will be provided for individuals undertaking this work.

PPE is provided for individuals working first aiders. The taking of PPE home is not permitted.

Adequate training has been provided on what PPE is required i.e. gloves, masks, aprons, Filtering Face Pieces (P3), goggles, the correct donning/doffing of PPE and face fit testing. Government advice is followed:

PHE quick guides for correct donning and doffing of PPE for non-AGPs. As well as for AGPs has been utilised for examples in best practice for putting on and taking off (donning and doffing).

The University strongly recommends individuals (including staff, students, visitors and contractors), unless exempt, wear face coverings inside all University buildings. This includes all corridors, circulation spaces and communal areas, all mixed-use office spaces when moving around, all teaching and learning settings, all study spaces and all libraries. Information provided by the University and local communications and signs displayed informing people of the requirement to wear a face covering within the building.

Spare face coverings are available for individuals who have forgotten to bring a face covering with them.

Individuals have been reminded through signage, team meeting, one to one meetings, health and safety committees/forums of how to use face coverings safely including the following:

When wearing a face covering you should:
- wash your hands thoroughly with soap and water for 20 seconds or use hand sanitiser before putting a face covering on and before and after removing it
- avoid wearing on your neck or forehead
- avoid touching the face covering or your face, as it could contaminate it with germs from your hands
- change the face covering if it becomes damp or if you’ve touched it
- continue to wash your hands regularly
- change or wash your face coverings daily
- if the material is washable, wash it in line with manufacturer’s instructions. If it’s not washable, dispose of it carefully in their usual waste

Extra non recycling bins to dispose of single use face coverings and PPE are provided, refer to the guidance on how to dispose of personal or business waste, including face coverings and PPE.
Biological

Suspected or known case of COVID-19

Staff

Students

Contractors

Visitors

Exposure to respiratory droplets carrying and contact with an object that has been contaminated with COVID-19.

Response plan in place in the event of a confirmed or suspected case of COVID-19 and communicated and includes:

- If a person becomes unwell in the workplace with suspected COVID-19, they will be sent home in accordance to the University guidance. If any students appear unwell or make comment or complain to staff members that they are feeling unwell they will be asked to leave the building with immediate effect and to follow the University’s Test, Trace and Protect Process.

- The area will be cleaned in accordance with the specific Government guidance.

- Provision and monitoring of adequate supplies of cleaning materials are in place.

- School briefed (via Once a team School meetings) on actions to be taken in the event of someone being suspected of having COVID-19.

- Staff must tell their line manager if they develop symptoms. Absence will be managed in accordance to the University guidance provided.

Employees to follow the Government advice: https://www.gov.uk/guidance/nhs-test-and-trace-workplace-guidance, if they test positive for Corona virus Absence will be managed in accordance to the University guidance provided.

- Line managers will maintain regular contact with staff members during this time, in accordance with the University sickness absence guidance and monitor for signs of symptoms in the remaining workforce and keep Senior Managers informed of the situation.

- If an individual tests positive for COVID-19 this will be managed in accordance with the University’s Test, Trace and Protect Process.

- If multiple cases of coronavirus appear in a workplace, an outbreak control team from either the local authority or Public Health England will, if necessary, be assigned to help the University manage the outbreak. The University will seek advice from the local authority in the first instance.

- Individuals will be told to isolate because they:
  - have coronavirus symptoms and are awaiting a test result
  - have tested positive for coronavirus
  - meet the criteria included in the Government Stay at Home Guidance

|   |   |   | | | Yes |
| Environmental Virus transmission in the workplace | Staff Students Contractors Visitors | Contact with an object that has been contaminated with COVID-19 and which subsequently transmits this to another person e.g. surfaces, any inanimate objects & touch points including work surfaces, work equipment, door handles, banisters, chair arms and floors. | Individuals have been instructed and are regularly reminded through signage to clean their hands frequently with soap and water for 20 seconds and the importance of proper drying in accordance with the NHS Guidance: https://www.nhs.uk/live-well/healthy-body/best-way-to-wash-your-hands/. Posters are displayed around the workplace including in welfare facilities and walkways. Soap and water and hand sanitiser are provided in the workplace and adequate supplies are maintained and are placed at the entrance to the building and in other areas such as high traffic corridors where they will be seen. Individuals have been informed to check their skin for dryness and cracking and to inform their line manager or supervisor if there is a problem. Individuals are reminded to catch coughs and sneezes in tissues – Follow: “Catch it, Bin it, Kill it” and to avoid touching face, eyes, nose or mouth with unclean hands. Posters are displayed around the workplace. To help reduce the spread of coronavirus (COVID-19) individuals are reminded in signage of the public health advice: https://www.gov.uk/government/publications/coronavirus-outbreak-faqs-what-you-can-and-cant-do/coronavirus-outbreak-faqs-what-you-can-and-cant-do A review of the cleaning regime for the building/area to ensure controls are in place to keep surfaces clean and free of contamination, cleaning products and disposable cloths have been made available to all occupants and everyone has been briefed in the building induction on the importance of keeping surfaces and work equipment clean. Clear use and cleaning guidance for toilets, showers, lockers and changing rooms are in place to ensure they are kept clean and clear of personal items. This includes enhanced cleaning of all facilities regularly during the day and at the end of the day using normal cleaning products. Disposable cloths or paper roll is provided to clean all hard surfaces especially frequently hand touched surfaces, in showers and changing rooms and hand sanitiser is available on entry and exit to the room. |
Facilities are kept well ventilated. For example, by ensuring any mechanical ventilation work effectively and opening windows and vents where possible.

Cleaning for busy areas in the building has been enhanced.

More waste facilities, and more frequent rubbish collection has been provided.

Sharing of equipment is restricted where possible and cleaned before and after use.

Cleaning process for all equipment, tools and vehicles, for example, pallet trucks and forklift trucks including expensive equipment that cannot be washed down has been determined and where necessary protection around machines and equipment has been designed.

Objects and surfaces that are touched regularly such as door handles and keyboards, are cleaned frequently using cleaning materials provided whilst making sure there are adequate disposal arrangements.

Internal doors that are not signed as fire doors (unless held open with a mechanical device) kept open whilst working (last person out shuts the doors) to prevent multiple people using door handles.

Use of hot desks and spaces avoided and, where not possible e.g. training facilities, machinery controls, workstations, PC clusters are cleaned by the users between different occupants including shared equipment.

There is clear desk policy in place to reduce the amount of personal items on desks and work benches to be practiced when the space is in use or not in use. Work areas and equipment are cleaned between use using usual cleaning products.

There are cleaning procedures for goods and merchandise entering the site. Greater handwashing and handwashing facilities have been introduced for workers handling goods and merchandise and hand sanitiser provided where this is not practical.

Everyone is encouraged in the induction to keep personal items clean including washing spectacles with soap and water, clean phones, keyboards and shared machinery handles etc. before after and during work.
Staff have been encouraged to bring their own food and kitchen utensils including mugs/cups, cutlery etc.

Lab clothing and equipment such as goggles washed on-site rather than by individual staff members at home. This is covered in the laboratory inductions.

Monitoring and supervision arrangements through senior management walk arounds have been put in place to ensure people are following controls e.g. implementing the new cleaning regime, following hygiene procedures etc.

All university staff and students are encouraged to avoid direct personal contact with others i.e. shaking hands etc.
Organisational Exposure to Existing Hazards

Staff

Students

Contractors

Visitors

Increased risk of harm due to controls included in existing risk assessments & safety arrangements affected by COVID-19 measures

All relevant pre-existing (non COVID) risk assessments including lone working assessments and procedures have been reviewed to take into account the impacts of COVID counter measures.

PPE related risk assessments have been reviewed to ensure that PPE is provided on an individual basis. Usage is monitored to ensure suitable level of stock of certain PPE such as face masks. Individuals maintain their own equipment in a sterile condition. Storage has been reviewed to provide individual storage arrangements. The taking of PPE home is not permitted.

Emergency Procedures reviewed and revised including:

- **Fire procedures**: number and details of nominated fire warden(s) in place, fire muster point confirmed and PEEP requirements defined including who will assist with their evacuation in an emergency. Required modifications to fire alarm practices and evacuation drills to cater for COVID-19 measures have been addressed; ensuring that the activity is still compliant with relevant building and fire codes.
- **First Aid**: First aid needs assessment reviewed to take into account the impact of any Local or National Government requirements and any new Guidelines issued by the University or HSE, and first aid information including the location of first aid kits and first aider contact information up to date.
- **Hygiene**: Washing facilities with soap/gel available People involved in the provision of assistance to others have been informed to pay particular attention to sanitation measures immediately afterwards including washing hands.

Safety critical roles will remain in place to aid safe operation. In the event of safety critical roles not being available then a dynamic risk assessment shall be performed by the Technical Manager or delegate to ensure measures are introduced to mitigate risk (for example, another area within the building or campus could have a critical role such as first aider that could cover as a temporary solution).

Security implications of changes made to operations and practices in response to COVID-19 Local or National Government requirements, have been considered and mitigations risks.
Business continuity and disaster recovery plans updated based on COVID-19 implications including contingency plan in place for possible switch back to national or local lockdown.

Life-saving rules, will continue to be governed, enforced and communicated during COVID-19 especially during any Local or National Government lockdowns in particular “speaking up” if they witness any unsafe behaviours, conditions or symptoms related to COVID-19.

### Environmental

| Inbound & Outbound Goods including Post | Staff Students Contractors Visitors | Exposure to contact with an object that has been contaminated with COVID-19. | Logistics for the deliveries to the building has been considered and include:

- Pick-up and drop-off collection times, procedures, signage and markings revised.
- Where possible and safe, single workers load or unload vehicles or if not possible the same pairs of people, with additional mitigating measures including the wearing of face coverings, are used for loads where more than one is needed.
- Procedures reviewed to enable safe exchange of paper copies where needed, for example, required transport documents.
- Strict hand washing procedure in place after handling all deliveries. |
|---|---|---|---|

### Organisational

| Travelling to work | Staff Students Contractors Visitors | Exposure to respiratory droplets carrying COVID-19. | Individuals travelling to University premises or on behalf of the University are encouraged to follow the [Government’s safer travel for passengers](https://www.gov.uk/government/collections/safer-travel) to help them stay safe, and protect others by controlling the spread.

Where people are travelling together in any one vehicle, they are encouraged to:

- Use fixed travel partners
- Not sit face-to-face
- Open windows and switch on ventilation systems that draw in fresh air. Open windows only partially if it’s cold.
- Frequently clean their vehicle including objects and surfaces that are touched regularly, such as door handles and vehicle keys. |

Environmental

Ventilation

Staff

Students

Contractors

Visitors

Exposure to respiratory droplets carrying COVID-19.

Ventilation systems are maintained in line with planned and preventative maintenance schedules, including filter changes.

An assessment of the ventilation in the building, and where necessary individual areas/rooms, has been undertaken which included checks such as:

- Is the space naturally or mechanically ventilated
- All areas within the building which are usually occupied and have poor ventilation have been identified and the use of the area re-assessed (see below).
- An assessment of Fresh air (ventilation) has been undertaken for the workplace and where necessary individual workspaces. This included how fresh air is provided (natural, mechanical or combination of both), how many people occupy/use the area, how much time people spend in the areas, how large the area is, what activities take place in the areas, the equipment and machinery in the workspaces, the use of fans and Local Exhaust Ventilation.

Recirculation of unfiltered air within the workplace has been avoided or reduced as far as possible. While this will continue to be minimised some area will need to have some recirculation, to improve thermal comfort.

Natural ventilation can be improved by fully or partially opening windows, air vents and doors, not signed as fire doors. This should be balanced against the need to maintain comfortable temperatures for all users of the space.

The University will be centrally monitoring carbon dioxide (CO2) as a proxy for air quality and ventilation in large teaching spaces. Information can be provided on these spaces.

Additional control can be provided via the use of portable CO2 sensors where there are any concerns raised about the adequacy of ventilation in a given space.

Rooms can be purged (aired) when not in use by leaving the windows and doors fully open. However, it is important to plan and close windows to minimise the risk of rodent and pigeon issues.

Staff have been informed, via this risk assessment of the following steps which they can take to make sure their workplace is adequately ventilated whilst maintaining a comfortable temperature:
● opening windows and doors partially can still provide acceptable ventilation while keeping the workplace comfortable. Opening higher-level windows will probably create fewer draughts.
● if the area is cold relax dress codes so people can wear extra layers and warmer clothing
● use natural ventilation alongside heating systems to maintain a reasonable temperature in the workplace.

Ventilation Instruction signs displayed throughout the building instructing individuals to “Please ensure you open all windows on arrival and close on departure.”

General considerations reflected on during reopening of the buildings in relation to the ventilation and fresh air to occupied spaces. Core strategy based on CIBSE Covid-19 Ventilation Guidance, HSE guidance, Government and other relevant industry guidance. The guidance is constantly under review by the University’s Estates, as SARS-CoV2 transmission routes become more clearly defined, and any updated recommendations assessed and implemented where relevant to University systems.

Risk Assessment Guidance

Risk Scoring System

The scoring system is provided as a tool to help structure thinking about assessments and to provide a framework for identifying which are the most serious risks and why.

| Consequence / Severity score (severity levels) and examples of descriptors |
|---|---|---|---|---|---|
| Domains | Negligible | Minor | Moderate | Major | Catastrophic |
| Impact on the safety of staff, students or public (physical / psychological harm) | Minimal injury not requiring first aid or requiring no/minimal intervention or treatment. No time off work | Minor injury or illness, first aid treatment needed or requiring minor intervention. Requiring time off work for <3 days | Moderate injury requiring professional intervention. Requiring time off work for 4-14 days | Major injury leading to long-term incapacity/disability (loss of limb). Requiring time off work for >14 days | Incident leading to death Multiple permanent injuries or irreversible health effects |

<table>
<thead>
<tr>
<th>Likelihood score</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Frequency</td>
<td>Rare</td>
<td>Unlikely</td>
<td>Possible</td>
<td>Likely</td>
<td>Almost certain</td>
</tr>
<tr>
<td>Broad descriptor</td>
<td>This will probably never happen/occur</td>
<td>Do not expect it to happen/occur but it is possible it may do so</td>
<td>Might happen/occur occasionally</td>
<td>Will probably happen/occur but it is not a persisting issue</td>
<td>Will undoubtedly happen/occur, possibly frequently</td>
</tr>
<tr>
<td>Time-framed descriptor</td>
<td>Not expected to occur for years</td>
<td>Expected to occur at least annually</td>
<td>Expected to occur at least monthly</td>
<td>Expected to occur at least weekly</td>
<td>Expected to occur at least daily</td>
</tr>
<tr>
<td>Probability</td>
<td>&lt;0.1 per cent</td>
<td>0.1–1 per cent</td>
<td>1.1–10 per cent</td>
<td>11–50 per cent</td>
<td>&gt;50 per cent</td>
</tr>
</tbody>
</table>

The overall level of risk is then calculated by multiplying the two scores together.

Risk Level = Consequence / Severity x Likelihood (C x L)
