<tr>
<td>Line managers are aware of how big changes to working arrangements may cause additional work-related stress and affect their employees’ mental health and wellbeing and individuals have been made aware via routine all staff emails, team meetings and 1:1 with staff and LM’s of guidance available in relation to this:</td>
<td>Line managers hold regular informal discussions with at least one dedicated discussion prior to building opening and look at ways to reduce causes of stress. Concerns on workload issues or support needs are escalated to line manager and discussed with the Director of Operations. Information on the full range of Coronavirus – Covid-19 support available for staff including those who were previously advised by Occupational Health or a medical professional (including a midwife in respect of pregnancy) not to work on campus and staff who are in the clinically extremely vulnerable group (i.e. those previously advised to shield) is available here. Existing risk assessments including those for new or expectant mothers reviewed and revised to reflect new working arrangements. Reasonable adjustments made, including those needed for PEEPs especially in relation to who will assist with their evacuation in an emergency, to avoid staff that require them including disabled workers being put at a disadvantage. Employees who have concerns about either working on Campus or working from home/remote have discussed these with their line manager or supervisor and concerns have been formally recorded and where necessary they have been signposted to the EAP for</td>
<td>3 2 6 Yes</td>

</table>
support and/or a referral to occupational health has been made using a standard Management Referral available via the HR Portal.

Employees are made aware of support mechanisms available to them (e.g., counselling, occupational health, HR, etc.) through line managers, internal communications and University webpages:

https://intranet.birmingham.ac.uk/staff/coronavirus/faqs-for-staff.aspx

https://intranet.birmingham.ac.uk/hr/wellbeing/index.aspx

https://intranet.birmingham.ac.uk/hr/wellbeing/workhealth/index.aspx

This link is for students: https://intranet.birmingham.ac.uk/student/coronavirus/Wellbeing.aspx

| Biological Virus transmission in the workplace | Staff and Students | Exposure to respiratory droplets carrying COVID-19 from an infectious individual transmitted via sneezing, coughing or speaking. | Staff continue to work using the mixed model of site and home based (hybrid working) as agreed with line manager, in line with Government and University guidance. Managers/supervisors ensure staff and students with any form of illness do not attend work/campus until the illness has been verified as not being Covid-19. Managers/supervisors keep track of when staff and students can return to work/campus after the self-isolation period. Regular access to the Lateral Flow Device tests and kits are available to staff and students who are coming onto campus. Staff and students are strongly encouraged to test twice a week and to record their results on the Government’s reporting website: https://www.gov.uk/report-covid19-result and to report any positive test results to the University using the COVID-19 reporting form. The University’s On-line-materials for returning to campus combination of the guidance and videos have been provided and completed for all staff working in University buildings. | 3 | 2 | 6 | Yes |
Schedules for essential services and contractor visits revised to reduce interaction and overlap between people and building managers and occupants informed of when the visits will take place and which services are being maintained. This will be coordinated centrally by Saroj Watton. Building maintenance will be scheduled for out of hours or areas where staff attendance is minimal.

Un-essential trips within buildings and sites discouraged and reduced,

| Environmental | Virus transmission in the workplace due to contact with other people | Staff and Students | Exposure to respiratory droplets carrying COVID-19 from an infectious individual transmitted via sneezing, coughing or speaking. | Workplaces and routines changed to reduce the number of people staff come into contact with including:
  - Change to peak staff entry and exit times.
  - Amended shift routines, staff handovers and team briefings - This is managed within teams whilst maintaining core reception hours and ensuring teaching delivery.
  - Staff have been separated into teams to reduce contact between employees. Staff have been assigned a room to work from. Rooms have not been fully occupied and staff encouraged to work in a different room/workstation if room becomes busy. Rooms have monitors and docking stations so staff can use own laptops.
  - Screens used for high contact areas such as reception point
  - Number of people each person has contact with is reduced by using ‘fixed teams or partnering’ (staff are initially designated a room to work from).
  - Welfare areas for serving hot food or drinks have been assessed in accordance with government guidance to reduce the number of people being able to congregate. Smaller kitchens continue to be used at reduced capacities. All users are encouraged to wash or sanitise their hands prior to using equipment (kettle, drinking water fountains, microwaves etc.) and to wash or sanitise their hands after use. Additional signage for the correct method for handwashing displayed. Cleaning materials are available to clean equipment before and after use and signs displayed with information about cleaning and also a contact to replenish the any cleaning materials. Signage also asks users to avoid touching the water | 3 | 2 | 6 | Yes |
cooler/fountain spout with their bottles or hands.

- Where available safe outside areas used for breaks. Additional outdoor furniture has been purchased.
- Welfare facilities (toilets etc.) have signage to remind people to wash their hands prior to and after use and also of any other measures required to ensure safe use of the facilities including building users being reminded to leave the facilities in a respectable condition.

To help contain clusters and outbreaks and assist the University with any requests for data by the NHS Test and Trace service a temporary record of shift patterns and teams and attendance in the building is kept for 21 days. NHS Test and Trace QR code is displayed in the building for visitors and staff to scan using the NHS Covid-19 app.

Work has been arranged so that staff are able to maintain the government guidelines for workplaces. The latest Guidelines on these measures can be found by clicking the following link Workplace Guidelines.

Priorsfield maintains a one-way entry and exit to the building – entering at the front and exiting at the back.

Visits from people outside of the building continue to be managed via remote connection/working where this is an option. Where this is not an option visitor and contractor arrangements have been revised to ensure:

- Clear guidance on how to reduce the risk of spreading COVID-19 to people is given to them, for example, by phone, on the website or by email or with on-site signage and visual aids and the particular needs of those with protected characteristics, such as those who are hearing or visually impaired have been considered.
- Host responsibilities related to COVID-19 have been established and any necessary training for people who act as hosts for visitors has been provided.
- Entry and exit routes for visitors and contractors have been reviewed to minimise contact with other people.
- In shared facilities e.g. with other employers COVID-19 related arrangements have been co-ordinated and there is co-operation by all
occupiers. This includes landlords and other tenants.

- Visitors are told they should be prepared to remove face coverings if asked to do so by police officers and staff for identification.
- Information provided to visitors does not compromise their safety.

These measures are monitored by the local supervising staff member, Saroj Watton and operations staff and where necessary concerns fed back to the third party manager e.g. LEV inspections and test – Estates Manager, Cleaner – Campus Services Domestic Manager and where necessary concerns fed back to the third party manager.

Information provided and signs displayed encouraging people to use the stairwells rather than lifts unless they have difficulty using the stairs and to wear face coverings inside lifts when used.

Non-work related gatherings (social) amongst employees have been discouraged whilst at work and alternative arrangements made where possible e.g. meeting virtually or outside.

Managers perform frequent evaluation against social contact controls. This is a regular discussion point at SMT. Staff are reminded via 1:1’s and all staff communications of the importance of reducing social contacts both in the workplace and outside of it.

Near-miss reporting is encouraged to identify where controls cannot be followed or people are not doing what they should.

Face coverings are not PPE and are not normally required to be worn in the workplace but the University strongly encourages staff, students, contractors and visitors to continue to wear face coverings inside buildings and where people choose to wear them they are supported.

Where face coverings may reduce the risk of transmission from one person to another e.g. in congested areas, crowded enclosed spaces and where people may come into contact with people they do not normally meet, signs are displayed requesting individuals to wear a face covering with the expectation that individuals will wear a face covering in these areas.
Individuals have been reminded through BIA briefing of how to use face coverings safely including the following:

When wearing a face covering you should:

- wash your hands thoroughly with soap and water for 20 seconds or use hand sanitiser before putting a face covering on and before and after removing it
- avoid wearing on your neck or forehead
- avoid touching the face covering or your face, as it could contaminate it with germs from your hands
- change the face covering if it becomes damp or if you’ve touched it
- continue to wash your hands regularly
- change or wash your face coverings daily
- if the material is washable, wash it in line with manufacturer’s instructions. If it’s not washable, dispose of it carefully in their usual waste

Extra non recycling bins to dispose of single use face coverings and PPE are provided, refer to the guidance on how to dispose of personal or business waste, including face coverings and PPE.

| Biological | Suspected or known case of COVID-19 | Staff and Students | Exposure to respiratory droplets carrying and contact with an object that has been contaminated with COVID-19. | Response plan in place in the event of a confirmed or suspected case of COVID-19 and communicated and includes:

- If a person becomes unwell in the workplace with suspected COVID-19, they will be sent home in accordance to the University guidance. If any students appear unwell or make comment or complain to staff members that they are feeling unwell they will be asked to leave the building with immediate effect and to follow the University’s Test, Trace and Protect Process.
- The area will be cleaned in accordance with the specific Government guidance.
- Provision and monitoring of adequate supplies of cleaning materials are in place.
- Team briefed via Return to Priorsfield and Lucas House briefing on actions to be taken in the event of someone being suspected of having COVID-19.
- Staff must tell their line manager if they develop symptoms. Absence will be managed in accordance to the University guidance provided. | 3 | 2 | 6 | Yes |
Employees to follow the Government advice: https://www.gov.uk/guidance/nhs-test-and-trace-workplace-guidance

- Line managers will maintain regular contact with staff members during this time, in accordance with the University sickness absence guidance and monitor for signs of symptoms in the remaining workforce and keep Senior Managers informed of the situation.
- If an individual tests positive for COVID-19 this will be managed in accordance with the University’s Test, Trace and Protect Process.
- If multiple cases of coronavirus appear in a workplace, an outbreak control team from either the local authority or Public Health England will, if necessary, be assigned to help the University manage the outbreak. The University will seek advice from the local authority in the first instance.
- Individuals will be told to isolate because they:
  - have coronavirus symptoms and are awaiting a test result
  - have tested positive for coronavirus
  - meet the criteria included in the Government Stay at Home Guidance.

| Biological | Someone entering the workplace with COVID-19 | Staff and Students | Exposure to respiratory droplets carrying and contact with an object that has been contaminated with COVID-19. | Companies who regularly attend or work in the building requested to provide their health and safety policy/arrangements / or RAMS (risk assessment and method statement) regarding COVID-19. Anybody visiting site will be informed that they are not to enter if they’re experiencing COVID-19 symptoms or should be self-isolating under the government Guidelines. If a person becomes unwell in a University workplace with suspected COVID-19, they will be sent home in accordance to their company’s and University’s guidance. University managers will follow the University’s Test, Trace and Protect Process and NHS Test and Trace workplace guidance any University staff that may have come into contact with them: https://www.gov.uk/guidance/nhs-test-and-trace-workplace-guidance | 3 | 2 | 6 | Yes |

| Environmental | Virus transmission in the workplace | Staff and Students | Contact with an object that has been contaminated with COVID-19 and which | Individuals have been instructed and are regularly reminded via building signage to clean their hands frequently with soap and water for 20 seconds and the importance of proper drying in accordance with the NHS Guidance: | 3 | 2 | 6 | Yes |
subsequently transmits this to another person e.g. surfaces, any inanimate objects & touch points including work surfaces, work equipment, door handles, banisters, chair arms and floors.

https://www.nhs.uk/live-well/healthy-body/best-way-to-wash-your-hands/

Soap and water and hand sanitiser are provided in the workplace and adequate supplies are maintained and are placed at the entrance to the building and in other areas where they will be seen.

Individuals have been informed to check their skin for dryness and cracking and to inform their line manager or supervisor if there is a problem.

Individuals are reminded to catch coughs and sneezes in tissues – Follow: “Catch it, Bin it, Kill it” and to avoid touching face, eyes, nose or mouth with unclean hands. Posters are displayed around the workplace.

A review of the cleaning regime for the building/area to ensure controls are in place to keep surfaces clean and free of contamination has been undertaken, cleaning products have been made available to all occupants and everyone has been briefed via the Priorsfield and Lucas House briefing on the importance of keeping surfaces and work equipment clean.

Clear use and cleaning guidance for toilets, showers, lockers and changing rooms are in place to ensure they’re kept clean and clear of personal items. This includes enhanced cleaning of all facilities regularly during the day and at the end of the day using normal cleaning products. Disposable cloths or paper roll is provided to clean all hard surfaces especially frequently hand touched surfaces, in showers and changing rooms and hand sanitiser is available on entry and exit to the room.

Facilities are kept well ventilated. For example, by ensuring any mechanical ventilation work effectively and opening windows and vents where possible.

Cleaning for busy areas in the building has been enhanced.
More waste facilities, and more frequent rubbish collection has been provided.

Sharing of equipment is restricted where possible and cleaned before and after use.

Cleaning process for all equipment, tools and vehicles, for example, pallet trucks and forklift trucks including expensive equipment that cannot be washed down has been determined and where necessary protection around machines and equipment has been designed.

Objects and surfaces that are touched regularly such as door handles and keyboards, are cleaned frequently using cleaning materials provided and whilst making sure there are adequate disposal arrangements.

Internal doors that are not signed as fire doors (unless held open with a mechanical device) kept open whilst working (last person out shuts the doors) to prevent multiple people using door handles.

Hot desking is not deployed the BIA. Staff are designated a room of which there are more desks than staff designated. Staff have been issued laptops to reduce risk of transmission. Cleaning products are also available to wipe down surfaces after use. If any one room is busy, staff are free to use other rooms with lower capacities.

There is clear desk policy in place to reduce the amount of personal items on desks and work benches to be practiced when the space is in use or not in use. Work areas and equipment are cleaned between use using usual cleaning products.

There are cleaning procedures for goods and merchandise entering the site. Greater handwashing and handwashing facilities have been introduced for workers handling goods and merchandise and hand sanitiser provided where this is not practical.

Everyone is encouraged to keep personal items clean including washing spectacles with soap and water, clean phones, keyboards and shared machinery handles etc. before after and during work.

All university staff are encouraged to avoid direct personal contact with others i.e. shaking hands etc.
| Organisational to Existing Hazards | Staff and Students | Increased risk of harm due to controls included in existing risk assessments & safety arrangements affected by COVID-19 measures | All relevant pre-existing (non COVID) risk assessments including lone working assessments and procedures have been reviewed to take into account the impacts of COVID counter measures. Emergency Procedures reviewed and revised including:  
- **Fire procedures**: number and details of nominated fire warden(s) in place, fire muster point confirmed. Required modifications to fire alarm practices and evacuation drills to cater for COVID-19 measures have been addressed; ensuring that the activity is still compliant with relevant building and fire codes.  
- **First Aid**: First aid needs assessment reviewed to take into account the impact of any Local or National Government requirements and any new Guidelines issued by the University or HSE, and first aid information including the location of first aid kits and first aider contact information up to date.  
- **Hygiene**: Washing facilities with soap/gel available People involved in the provision of assistance to others have been informed to pay particular attention to sanitation measures immediately afterwards including washing hands.  
Business continuity and disaster recovery plans updated based on COVID-19 implications including contingency plan in place for possible switch back to national or local lockdown.  
Life-saving rules, will continue to be governed, enforced and communicated during COVID-19 especially during any Local or National Government lockdowns in particular “speaking up” if they witness any unsafe behaviours, conditions or symptoms related to COVID-19. |

| Environmental Inbound & Outbound Goods including Post | Staff | Exposure to contact with an object that has been contaminated with COVID-19. | Logistics for the deliveries to the building so that social distancing can be maintained at all times has been considered and include:  
- **Pick-up and drop-off collection points**, procedures, signage and markings revised.  
- **Unnecessary contact at delivery bay** has been minimised e.g. non-contact deliveries where the nature of the product allows for use of electronic pre-booking.  
- **Methods to reduce frequency of deliveries in place** - ordering larger quantities less often. |

| 2 | 1 | 2 | Yes |

| 3 | 2 | 6 | Yes |
- Electronic paperwork is used where possible, and procedures reviewed to enable safe exchange of paper copies where needed, for example, required transport documents.
- Delivery and receipt confirmation made contactless and physical contact when handing goods over to the customer has been avoided.
- Where possible all deliveries are stripped of all packaging (which is disposed of).
- Strict hand washing procedure in place after handling all deliveries.
- Where possible deliveries to remain isolated and untouched for a minimum of 48 hours.

<table>
<thead>
<tr>
<th>Organisational</th>
<th>Travelling to work</th>
<th>Staff</th>
<th>Exposure to respiratory droplets carrying COVID-19.</th>
</tr>
</thead>
</table>
| Individuals travelling to University premises or on behalf of the University are encouraged to follow the [Government’s safer travel for passengers](https://www.gov.uk/government/publications/safer-travel-for-passengers) to help them stay safe, and protect others by controlling the spread. Where people are travelling together in any one vehicle, they are encouraged to:  
- use fixed travel partners  
- not sit face-to-face  
- open windows and switch on ventilation systems that draw in fresh air. Open windows only partially if it’s cold.  
- frequently clean their vehicle including objects and surfaces that are touched regularly, such as door handles and vehicle keys. |
| 3 | 2 | 6 | Yes |

<table>
<thead>
<tr>
<th>Environmental</th>
<th>Ventilation</th>
<th>Staff and Students</th>
<th>Exposure to respiratory droplets carrying COVID-19.</th>
</tr>
</thead>
</table>
| Ventilation systems are maintained in line with planned and preventative maintenance schedules, including filter changes.  
An assessment of the ventilation in the building, and where necessary individual areas/rooms, has been undertaken which included checks such as:  
- Mechanical ventilation is not in place, primary ventilation involves opening of windows/doors.  
- No areas of the building have been assessed as having poor ventilation  
- An assessment of Fresh air (ventilation) has been undertaken for the workplace and where necessary individual workspaces. This included how fresh air is provided (natural, mechanical or combination of both), how many people occupy/use the area, how much time people spend in the areas, how large the area is, what activities take place in the areas, the equipment |
| 3 | 2 | 6 | Yes |
and machinery in the workspaces, the use of fans and Local Exhaust Ventilation.

Natural ventilation can be improved by fully or partially opening windows, air vents and doors, not signed as fire doors. This should be balanced against the need to maintain comfortable temperatures for all users of the space.

The University will be centrally monitoring carbon dioxide (CO2) as a proxy for air quality and ventilation in large teaching spaces. Information can be provided on these spaces. Additional control can be provided via the use of portable CO2 sensors where there are any concerns raised about the adequacy of ventilation in a given space.

Rooms can be purged (aired) when not in use by leaving the windows and doors fully open. However, it is important to plan and close windows to minimise the risk of rodent and pigeon issues.

Staff have been informed, via this risk assessment of the following steps which they can take to make sure their workplace is adequately ventilated whilst maintaining a comfortable temperature:

- opening windows and doors partially can still provide acceptable ventilation while keeping the workplace comfortable. Opening higher-level windows will probably create fewer draughts.
- if the area is cold relax dress codes so people can wear extra layers and warmer clothing
- use natural ventilation alongside heating systems to maintain a reasonable temperature in the workplace.

Ventilation Instruction signs displayed throughout the building instructing individuals to "Please ensure you open all windows on arrival and close on departure."

Most mechanical ventilation systems are monitored by building management systems that will raise a fault alarm; but please ensure that any potential fault with mechanical or natural ventilation is raised with the Building Management and or the Estates Helpdesk.
General considerations reflected on during reopening of the buildings in relation to the ventilation and fresh air to occupied spaces. Core strategy based on CIBSE Covid-19 Ventilation Guidance, HSE guidance, Government and other relevant industry guidance. The guidance is constantly under review by the University’s Estates, as SARS-CoV2 transmission routes become more clearly defined, and any updated recommendations assessed and implemented where relevant to University systems.

HSE - Keeping workplaces safe as coronavirus (COVID-19) restrictions are removed - Updated 19 July 2021
# Risk Assessment Guidance

## Risk Scoring System

The scoring system is provided as a tool to help structure thinking about assessments and to provide a framework for identifying which are the most serious risks and why.

| Consequence / Severity score (severity levels) and examples of descriptors |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| **Domains** | **Negligible** | **Minor** | **Moderate** | **Major** | **Catastrophic** |
| Impact on the safety of staff, students or public (physical / psychological harm) | Minimal injury not requiring first aid or requiring no/minimal intervention or treatment. No time off work | Minor injury or illness, first aid treatment needed or requiring minor intervention. Requiring time off work for <3 days | Moderate injury requiring professional intervention Requiring time off work for 4-14 days RIDDOR / MHRA / agency reportable incident | Major injury leading to long-term incapacity / disability (loss of limb) Requiring time off work for >14 days | Incident leading to death Multiple permanent injuries or irreversible health effects |

<table>
<thead>
<tr>
<th>Likelihood score</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Frequency</strong></td>
<td>Rare</td>
<td>Unlikely</td>
<td>Possible</td>
<td>Likely</td>
<td>Almost certain</td>
</tr>
<tr>
<td><strong>Broad descriptor</strong></td>
<td>This will probably never happen/occur</td>
<td>Do not expect it to happen/occur but it is possible it may do so</td>
<td>Might happen or occur occasionally</td>
<td>Will probably happen/occur but it is not a persisting issue</td>
<td>Will undoubtedly happen/occur, possibly frequently</td>
</tr>
<tr>
<td><strong>Time-framed descriptor</strong></td>
<td>Not expected to occur for years</td>
<td>Expected to occur at least annually</td>
<td>Expected to occur at least monthly</td>
<td>Expected to occur at least weekly</td>
<td>Expected to occur at least daily</td>
</tr>
<tr>
<td><strong>Probability</strong></td>
<td>&lt;0.1 per cent</td>
<td>0.1–1 per cent</td>
<td>1.1–10 per cent</td>
<td>11–50 per cent</td>
<td>&gt;50 per cent</td>
</tr>
</tbody>
</table>

The overall **level of risk** is then calculated by multiplying the two scores together.

**Risk Level = Consequence / Severity x Likelihood (C x L)**

<table>

The Initial Risk Rating is the level of risk before control measures have been applied or with current control measures in place.

The Residual Risk is the level of risk after further control measures are put in place.
